

JON VIC T. BARCENAS

Motivated Bachelor of Science in Information Technology student and junior developer with interest in web development, systems, AI-assisted workflows, and practical automation. Builds real projects using React, TypeScript, Java, Python/Django, and Android/Kotlin. Eager to learn, comfortable using GitHub, and focused on clear communication, careful debugging, and improving workflows.

EDUCATION

College Level:

Cebu Institute of Technology - University | Cebu City Philippines

Bachelor of Science in
Information Technology

2023 - present

Senior High School:

PAU Excellencia Global Academy Foundation Inc.

| Toledo City, Cebu Philippines

STEM Strand | with high honors
2021 - 2023

PERSONAL SKILLS

- Clear written communication
- Problem solving and debugging
- Attention to detail
- Organized and willing to learn
- Comfortable asking clarifying questions
- Reliable remote work mindset

TECHNICAL SKILLS

Programming / Web

- HTML, CSS, JavaScript, TypeScript
- React, Vite, Tailwind CSS
- Java, Kotlin, C#, Python basics
- Django basics and REST/API concepts

Tools & Workflow

- Git & GitHub
- VS Code / IntelliJ / Android Studio
- Vercel deployment
- Linux/Ubuntu environment basics
- Vitest testing and QA mindset
- Docker
- Figma

Database / Systems

- Database design, data modeling, and entity relationship planning
- SQL/NoSQL database exposure using SQLite, PostgreSQL, and MongoDB
- Role-based access control and user management systems
- Inventory, catalog, transaction, and record-tracking system concepts

PROJECTS

EndoBridge - AI-Assisted Insight Report Web App

- Built a React + TypeScript web app that generates structured insight reports from submitted session/lab data.
- Implemented a user-facing report UI with print/share support, safety disclaimers, and clear observational summaries.
- Added API logic for Gemini-based insight generation with validation, rate limiting, and unsafe-output checks.
- Included tests using Vitest for app behavior, validation, local storage, scoring, and service logic.
- GitHub: github.com/jonvicbarcenas/endobridge

AI TOOLS

- ChatGPT and Codex for debugging, planning, code review, and learning new concepts
- Gemini/AI APIs explored through project work
- Uses AI outputs as guidance, then tests and adjusts code manually

COURSEWORK / INTERESTS

- Software development
- Object-oriented programming
- Mobile application development
- Database systems
- Software testing and defects
- Networking and Windows Server labs
- Cybersecurity and ethical hacking interest
- Scraping

AVAILABILITY

- Part-time remote work
- Comfortable learning new tools
- Open to mentorship and feedback

Streanime / Anime Website Work

- Worked on anime website/project ideas involving web pages, APIs, content access, and user growth/SEO planning.
- Practiced turning a personal interest into a practical web product with real users in mind.
- Link: [Aniwatchtv.tech](https://aniwatchtv.tech)

Aniwatch Mobile Development - Android/Kotlin

- Built Android features involving activities, fragments, RecyclerView, adapters, reminders, notifications, security settings, watchlist, and history screens.
- Practiced Android Studio, Gradle, API communication concepts, and mobile UI/state management.

Myrnhelm: Java OOP / Game Development

- Practiced Java OOP concepts through lab activities and game related systems.
- Explored LibGDX/LITIENGINE ideas such as NPC systems, quest systems, JSON parsing, and collision logic.

WHY I FIT JUNIOR DEVELOPER - SYSTEMS, WEB AND AI TOOLS

- I already build small projects and can explain my GitHub work honestly.
- I use AI tools day-to-day for debugging, planning, learning, and improving code quality.
- I am comfortable with frontend work and willing to grow into automation tools like Airtable, Make, and Google Apps Script.
- I prefer systematic work: clear requirements, small tasks, testing, and steady improvement.
